

New From

MAC

WORLD'S SHARPEST KNIVES

New! Ridged and Smooth sides

Ridged sides for more aggressive honing

Smooth sides for fine polishing

Simply turn the rod 90° to change coarseness

Unique Break-Resistant Design (Patent Pending)

Steel core reinforces and stabilizes the ceramic rod

Rubber sleeve between core and rod absorbs shock

New! Polypropylene Tip Cap

Flush mount no longer interferes with blade path

Cushions and protects the rod against damage

Treated to resist slipping when positioned against cutting board or countertop

Available in:

8½" (SRB-84) and 10½" (SRB-104) Rod lengths

Extreme Hardness of Black Ceramic

Much harder than traditional ceramic or steel rods

Works on any brand of knife

Blade scuff marks are nearly invisible

Will not rust like steel rods

Steel Handle Cap

Resists cuts & scratches

Extra protection for fingers & hand

New! Black Polypropylene Handle

MAC logo permanently embossed into handle

Secure & comfortable

Convenient hanging loop

Lifetime Warranty

Damaged rods will be replaced for a nominal fee of \$15
